

Curriculum vitae

DATE PERSONALE

Nume, prenume: **ELENA - MARIA - ANTOANETA GANEA**

Institutul de Biochimie , Academia Romana, Splaiul Independentei 296,
Bucuresti, Romania.

elena.ganea@biochim.ro <http://www.biochim.ro>

EXPERIENTA PROFESIONALA

Senior Researcher I (1994 – prezent) Institutul de Biochimie, Academia Romana (IBAR),
Bucuresti.

Conducator de Doctorat, ordinul ministerului educatiei nationale, nr.3775/10.5.2000. Cercetare,
indrumarea doctoranzilor si a membrilor departamentului, redenumit “Protein Folding”

Senior Researcher II (1990 – 1994) IBAR, Bucuresti. Cercetare, indrumat masterat, coordonat
activitatea in departament.

Senior Researcher III (1981-1990), IBAR, Bucuresti, cercetare departmentul “Post translational
modifications of proteins”, indrumator studenti practica, colaboratori, masteranzi.

Cercetator stiintific (1973-1981), IBAR, Bucuresti, Cercetare stiintifica, SlgA, rol glicoproteine.

Cercetator stiintific (CS), (1965 – 1973) Institutul de Endocrinologie C.I.Parhon, Department
Biochimie, Bucuresti.

EDUCATIE si FORMARE

1960 – 1965 Universitatea Bucuresti, Facultatea de Chimie, departament Biochimie, B.S. M.S.

1971-1977 **PhD** in Biochemistry (Biology): “*Hydroxyproline and the Metabolism of Collagen in
Endocrine Diseases*”.

RESEARCH INTERESTS

- Lysosomal endoproteinase
 - The role of carbohydrate moiety of glycoproteins.
 - Non-enzymatic posttranslational modifications of proteins (aldehyde binding, cyanate binding);

- Non-enzymatic glycosylation of proteins (BSA, MBP, IgG, enzymes, crystallin proteins); ways of inhibition.
 - Protein folding, the role of α -crystallin as molecular chaperone.
 - The effect of macromolecular crowding on protein structure and functions.

RESEARCH PROJECTS

- 36 national research projects - Director.
- 2 international projects – Director : 1996, *Lens membrane proteins*, Medical Research Council, UK; 1998-1999, *Labile Enzymes of lens* Wellcome Trust, UK
- 1 international program - collaborator COST- B17 “*Insulin resistance, obesity and Diabetes Mellitus in elderly*” 1998-2005 - Responsabil project

List of research grants as coordinator:

1. PNCII contract 42-103 2008-2011. *Sinteza si evaluarea farmacologica a noi compusi pentru implementarea de terapii moderne in tratamentul obezitatii si/sau diabetului de tip 2: cercetari preparative, structura, screening farmacologic.*
2. *Detection and estimation a possible inhibitory effect of newly synthesized compounds on nonenzymatic glycosylation of proteins in vitro.* PNCII contract 42-103 2008-2011
3. “*The protective effect of metabolic and synthetic compounds on insulin, against glycation induced modifications*”. Grant C.N.C.S.I.S., 2007-2008
4. “*The effect of macromolecular crowding on protein structure and function*”. Grant C.N.C.S.I.S, type A, 2003 - 2005
5. “*The excluded volume effect on protein folding and assemble*”. Grant Romanian Academy, nr.81/2004
6. “*Artificial chaperones, a way of protein refolding*”. Grant Romanian Academy 2005-2006.
7. “*Enzymes reactivation by heat shock proteins*”. Grant C.N.C.S.I.S. 2001-2002
8. “*Alpha crystallin as molecular chaperone, protects the enzymes against glycation induced inactivation*”. Grant Romanian Academy, 2000-2001

List of research grants as partener group lider:

1. PNCII contract 42-103/2008-2011 *Efectul compusilor nou sintetizati asupra formarii produsilor de glicozilare avansata (AGEs) si a interactiei acestora cu receptorii specifici*

- 2.. *Intracellular traffic and signaling properties of the AGEs receptors (RAGE), under pathological conditions.* Grant C.N.C.S.I.S. 2007-2009
3. *Molecular interactions - the effect on conformation and molecular stability.* Grant C.N.C.S.I.S. 2007-2008
4. *Synthesis and biological evaluation of new heterocyclic compounds, potential inhibitors of matrix metalloproteinases.* Grant CEEX, 2006-2008
5. "Aminopeptidases renatured by artificial chaperones " Grant C.N.C.S.I.S., AT, Nr. 32492/22.06.2004

PUBLICATIONS

Papers more than 150

Selected papers

1. Popa I, **Ganea E**, Petrescu SM "Expression and subcellular localization of RAGE in melanoma cells." *Biochem.Cell.Biol.*, 92(2), 127-136 (2014)
